

SILLS

Available in: 18", 24"

Description: Lightweight concrete Sills.

Standard

Colors: Brown, Buff, Carmel Brown, Chocolate, Dark Grey, and Light Grey.

Size:	18"	24"
Height:	2-1/2"	2-1/2"
Length:	18"	24"
Thickness:	3-1/2"	3-1/2"
Approx. Weight:	6.4 Lbs.	9 Lbs.

Installation: Sills are most commonly used to terminate a wainscot, and facilitate water diversion.

Sealing: Sealing is not required on Rocky Mountain Stone Products. But, if you would like to seal your stone, use only a quality masonry sealer that is of "Penetrating Breathable" type that is either a Silane or Siloxane based product. As with any sealer, the color of the stone may change after an application. Be sure to test the sealer on several different inconspicuous places on the stone, to determine if the color change is acceptable.
